To the first heads of the state structures directly subordinated and accountable President of Republic Kazakhstan, the central and local executive powers, other state structures to provide strict and timely execution of actions of the Plan and the Program. 4.

To recognize as become invalid the Decree of the President of Republic Kazakhstan from August, 15th, 2003 N 1165 "About the further measures on realisation of Strategy of development of Kazakhstan till 2030" 5. The control over execution of the present Decree to assign to Republic Kazakhstan Presidential Administration. 6. The present Decree is installed from the date of signing.

The program of the Government of Republic Kazakhstan for 2006-2008 is developed on the basis of the Strategic plan for development of Republic Kazakhstan for the period till 2010 and directed on the further realization of Strategy of development of Kazakhstan till 2030. Priorities and priorities for Program action follow from the commissions of the Head of the state stated in the Message of the President to the people of Kazakhstan on March, 1st, 2006 "Strategy of occurrence of Kazakhstan in number of fifty most competitive countries of the world". The basic results of the Program of the Government of Republic Kazakhstan for 2003-2006 the Overall objective of the Program of the Government for 2003-2006 had been defined growth of well-being of the population on the basis of the political stability, steady social and economic development, strengthening of economic safety. The government has executed tasks in view. In particular, per 2003-2006 it was planned to provide a mid-annual real gain of gross national product at a rate of 7-7,5 %. The balanced economic policy and consecutive carrying out of reforms have allowed to provide mid-annual rate of increase of gross national product during 2003-2005 at a rate of 9,4 %. In 2005, under the preliminary statistical data, gross national product gain in comparison with previous year has made 9,4 %, in relation to 2003 - 31,1 %. To adequately economic growth there is an increase of well-being of a life of the population of Kazakhstan. In this area the problem was put to raise gross national product level per capita in 2006 to 2 600 US dollars. However already following the results of 2005 of gross national product per capita, according to preliminary data, has made 3 700 US dollars. As a whole for 2003-2005 counting on soul of the population gross national product volume has grown in 1,3 times. Successes of social and economic development of Kazakhstan have been recognized by all international financial and rating agencies. On the index of competitiveness published in the

Report of the World economic forum in 2005, Kazakhstan, participating for the first time, has occupied 61 place, having left behind all CIS countries. In the rating of economic freedom published in January, 2006, Kazakhstan for one year has risen with 130 on 113 place, having outstripped Russia (122 place), closely having come nearer to China (111 place). The purpose of the Program of the Government of Republic Kazakhstan for 2006-2008 and expected results Proceeding from necessity of achievement of the purposes put by the President of the country, and also confirming continuity in realization of the basic directions of development of economy, the Government defines as an overall objective creation favorable institutional and economic conditions for increase of the international competitiveness of Kazakhstan and quality of a life of citizens of the country. It will allow to provide the decision of a strategic problem on occurrence of Kazakhstan the next ten years in number of fifty most competitive countries of the world.

The next three years the Government puts before itself a problem of achievement of following key indicators of performance of the Program. A mid-annual real gain of gross national product at a rate of 8,5 % that will allow to solve a strategic problem on gross national product doubling in 2008 in relation to 2000. The general growth of economy for three years is planned at level of 27,7 %. Gross national product growth per capita in 2008 to 5559 US dollars that in 1,5 times above today's level. Labor productivity growth on the average on 8,5 % annually. A mid-annual gain of industrial production - 5 %, including in a manufacturing industry - 6,7 %. Growth of investments into a fixed capital - on the average on 15,7 % a year. Level of mid-annual inflation - "in a corridor" 5,7 %-7,3 % in 2006, 5 %-7 % - in 2007-2008.

Priority directions of the Program of the Government of Republic Kazakhstan for 2006-2008 for 2006-2008 according to commissions of the President of the country are defined by Priority directions of activity of the Government of Republic Kazakhstan: 1. Effective integration into economic as a basis of qualitative break in economic development of the country. 2. The further modernization and a diversification of economy of Kazakhstan as the base of steady economic growth. 3. The modern social policy aimed at protection of the most vulnerable levels of population and stimulating productive development of economy. 4. Development of a modern education system, prosperity of culture and development of spiritual potential of the people. 5. The further development of democracy and modernization of political system, preservation of the international and intercultural consent. 6. Strengthening of statehood and system of the national safety adequate to modern threats and calls. 7. The further realization of the balanced foreign policy. According to the given directions work of the Government of Republic Kazakhstan for 2006-2008 will be constructed.
