Resilience and Economic Growth in Times of High Uncertainty is a compendium of chapters by prominent researchers addressing some of the most important economic growth issues in the CAREC region. The book is targeted at an advanced group of researchers, policymakers, and senior practitioners for whom it aims to be a useful resource. It is intended to provide a well-informed and authoritative guide to the economic growth matters of CAREC economies and to the current debates taking place in the field of sustaining resilience in a post-COVID-19 period. The chapters address key questions on recovering SMEs, sustainable agriculture and food security, green growth and climate risks, and e-commerce.
